## Minecraft

I want to build a website with multiple pages and a navigation bar about the world of Minecraft! Minecraft is a popular sandbox game that allows you to explore a three-dimensional generated world and interact with the world's materials. I mainly want to feature the gameplay as well as how the game came into development and into the hands of millions of users. The focus of my website is to inform the reader about the magical world of Minecraft!

- Home Page
- Development
- Gameplay
  - Game Modes → Survival, Creative
  - World Building & Customization
  - Storyline
- Characters
  - Featuring the many characters you can meet!
- Worlds
  - Overworld, the Nether, the End
